

IaaS Services

Accelerate your IaaS business and get **More as a Service** with Ingram Micro Cloud

Building and growing a successful Infrastructure-as-a-Service (IaaS) business can be challenging, but with Ingram Micro Cloud as your partner, you can leverage the services available to you and take advantage of more opportunities from cloud's three big players: Azure, AWS and IBM.

On Ingram Micro Cloud Marketplace, you'll have the solutions, products and services you need to scale quickly—and profitably.

Migration Services

Manage your large workloads in a shorter amount of time and seize opportunities faster with successive services that build upon each other:

- Discovery & Assessment Services
- Architecture & Design Services
- Proof of Concept Services
- Migration Services

Managed Services

Focus on your application and on building your business—it's easy when your infrastructure is managed by certified cloud experts.

Choose from standard, professional, or premium cloud management services.

Cost Optimization Services

Track, manage and optimize your cloud services through a cost optimization portal—and get support from IaaS experts for your AWS and Azure environments.
