Michael Dell

# Dell EMC Unity XT & SC Series benefits

Simple	Install & Service; Integrated Hybrid Cloud
Inline Data Reduction	Balanced performance and storage efficiency
Unified	Transactional and traditional file workloads with block
Flexible	Converged, software defined or cloud enabled. DIP upgrades.

## Dell EMC Unity XT Series

Federated	Scale-up block with the ability to federate arrays
Compression & Deduplication	Post-process compression/dedupe for flash & hybrid max cost savings
SAS Front-end	Option to connect using SAS interconnect
Metro DR	Transparent Metro DR for block with Live Volume Auto Failover

**FUTURE-PROOF**  
LOYALTY PROGRAM

1 - SCv3xxx max capacity may be increased to 2PB using 4MB page sizes.

2 - With 2MB page size. For maximum flash performance, 512K page sizes are recommended. See Release Notes and Sizer for details.

3 - External key manager

# SC Series All-Flash Arrays

# SC All-Flash Arrays: Powerful

SC5020F & SC7020F

## Best Performance

400,000+ IOPS per array, 4+ million aggregate IOPS per multi-array federation

## Best Efficiency

3X-10X data reduction with both compression and deduplication

## Enterprise Features

Federated multi-protocol storage that can scale-up and out

## Lowest Price

<\$1/GB effective for All-Flash with all software included

# SC All-Flash Model Selection

## Base arrays

- (30) 2.5" internal drive bays, 3U
- Dual, active/active controllers
- Multi-protocol I/O

### SC5020F

222 drive max (2.1PB raw)  
2 processors per array  
8,000 snaps, 19,000 MB/sec

### SC7020F

606 drive max (4PB raw)  
4 processors per array  
16,000 snaps, 29,000 MB/sec

## Expansion

- (24) 2.5" drive bays, 2U
- 12GB SAS

### SC420F

Supports either base array

## No License Costs!

Included SW covers FULL expansion capacity

# Dynamic: SC Federation = Adaptive Agility

## SC All-Flash

### Online Data Migration

Performance based on internal tests by Dell EMC in October, 2017. 100% sequential reads with 8K sector transfer size. Actual performance will vary based on configurations and usage and manufacturing variability.

**Dell** Technologies

# Efficient: All-in-1 format, All-inclusive Value

**Data Progression**  
RAID tiering  
  
**Multiprotocol**  
FC, iSCSI

**Cross-platform Replication**  
  
**Secure Encryption**  
Departmental Chargeback

**Best-in-Class Dedupe and Compression**  

**Business Continuity / Disaster Recovery**  
VVOLs, Qos  

**Federated scale, mobility, availability**  
Multi-protocol  
VLAN Tagging  
  
Replication over FC or IP  
  
**Cloud-based AI/ML**

**EVERY advanced SCOS feature is included + no capacity licenses!**

**EASY to purchase, maintain – no matter how your business evolves**

# SC Series Hybrid Arrays

# You choose how much flash you need

## 0-100% Flash Architecture

Target any price/performance mix

**Change the mix as your business needs evolve**

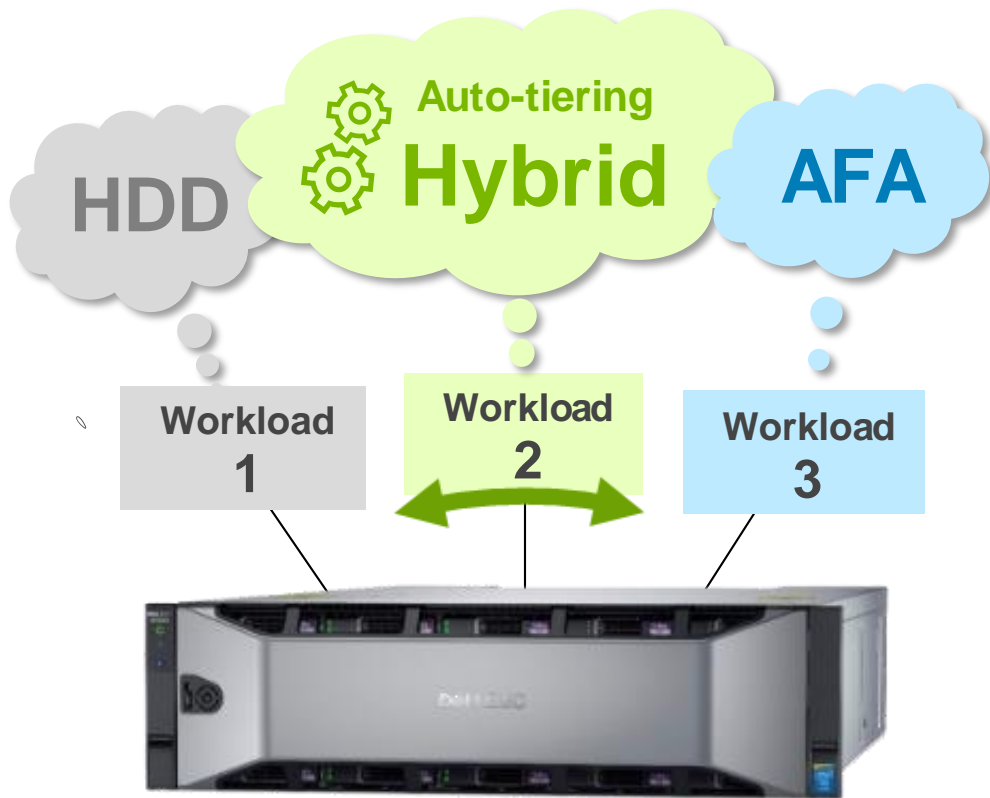

- ✓ Add SSD performance
- ✓ Add “cheap and deep” HDD storage as cold data volumes grow

Always  
lowest \$/GB\*

\* Source: Dell internal analysis, March 2017, street price compared to major-vendor midrange products. Net effective capacity after applying data reduction. Customer's price and reduction ratio may vary.

# Give each workload the resources it needs

**Like having three arrays in one box**

**Pin volumes to any tier, or let Data Progression distribute automatically**

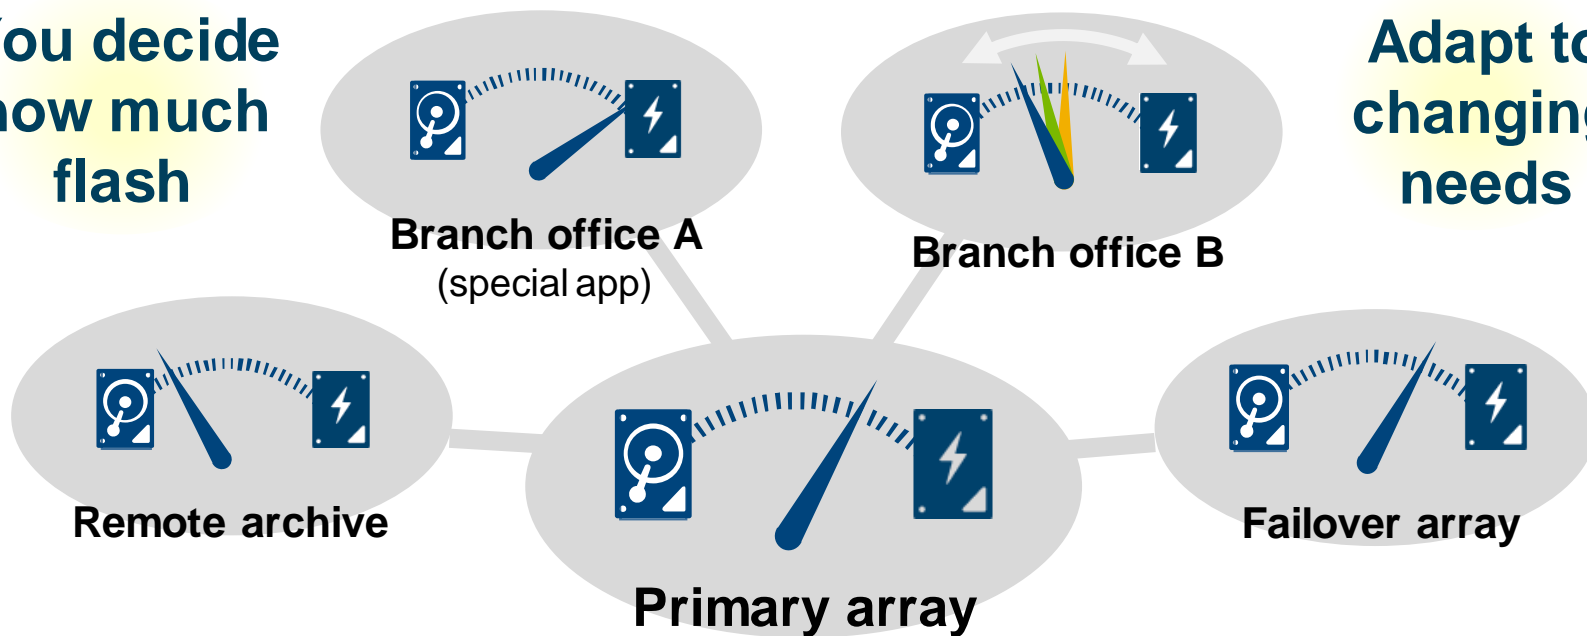

**Size flash tier as needed – but \$/GB remains lowest at any mix\***

\* Source: Based on Dell internal analysis, March 2017, compared to major-vendor midrange products. Net effective capacity after applying data reduction. Customer's price and reduction ratio may vary.

# Invest where and when you need to

You decide  
how much  
flash

Adapt to  
changing  
needs

**Unified management and federated data mobility**

# SCv3000 Series arrays and expansion

## Base Arrays

- Dual active controllers
- Internal drive slots
- Multi-protocol I/O

+ Any SCv3xx enclosure

### SCv3000

(16) 3.5" drive bays, 3U

### SCv3020

(30) 2.5" drive bays, 3U

## Expansion Enclosures

- 12Gb SAS
- Mix/match to 222 drive max per array

### SCv300

(12) 3.5" drive bays, 2U

### SCv320

(24) 2.5" drive bays, 2U

### SCv360

(60) 3.5" drive bays, 4U

# SC5020

**8-core Intel Processors**

**4X more Memory<sup>1</sup>**

**12Gb SAS, Modular I/O**

**Up to 45% More IOPS<sup>1</sup>**

**2x Max Raw Capacity (2.16PB)<sup>1</sup>**

**New 3U Form Factor**  
(30 internal drive bays)

**Simplified SW licensing**

**ProDeploy Services Option**  
(lower cost install)

**Data-in-Place upgrades from popular SC4020 available!<sup>2</sup>**

- ✓ 0-100% Flash architecture
- ✓ Intelligent Dedupe, Compression
- ✓ Data Progression, RAID tiering
- ✓ Built-in Federation, Data Mobility
- ✓ Business Continuity, QoS, Encryption

1 – Compared to previous-generation SC4020. Capacity assumes 7.3 firmware and 2MB pagesizes. See SCOS 7.3 section for latest performance numbers

2 – Requires SCOS 7.3 firmware. See SCOS 7.3 section for details.

# Flagship SC Performance and Capacity

## SC7020

### 3U expandable all-in-one format

- (30) 2.5" drives, dual hot-swap controllers
- Integrated I/O (29,000 MB/s max throughput)
- 606 drives, 4PB raw max expansion

## SC9000

### Highest-performing SC Series offering

- 2U discrete controller (deploy in pairs)
- Integrated I/O (33,000 MB/s max throughput)
- 1,024 drives, 6PB raw max expansion

## ENTERPRISE FEATURES | GUARANTEED EFFICIENCY

0-100% Flash architecture, Intelligent Dedupe/Compression, Data Progression, RAID tiering, Federation, Built-in Business Continuity, QoS, Encryption, more...

See SCOS 7.3 section for latest performance numbers

**DELL**Technologies

# Dynamic: Federation = Adaptive Agility

## SC Hybrid

### Online Data Migration

ZERO workload downtime,  
snapshots fully preserved

Live Migrate

### Online Load Balancing

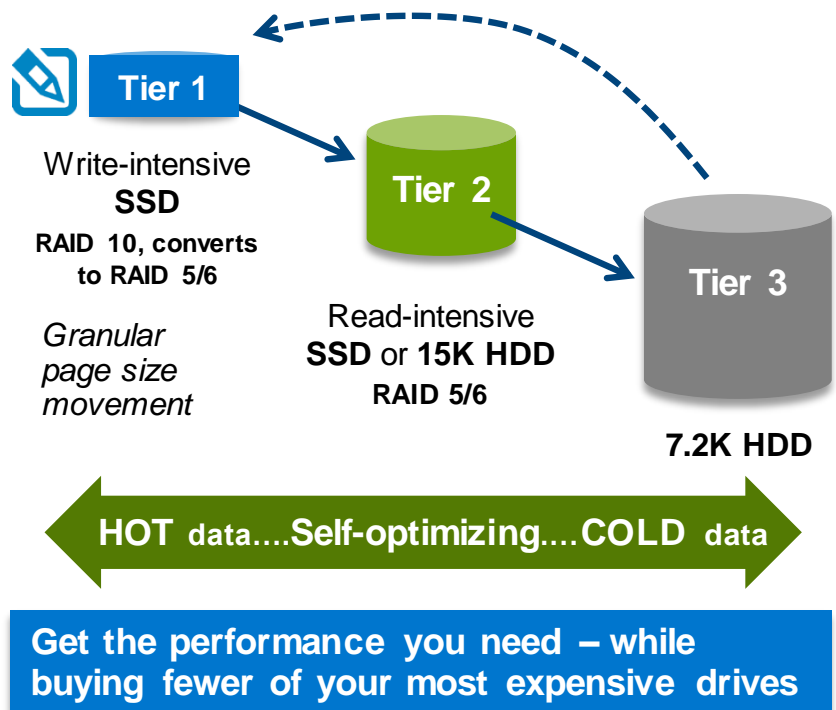

Volume Advisor

### Online Disaster Recovery

Live Volume

# Granular auto-tiering (data progression)

## Achieve simultaneous performance and cost goals

- Directs ALL incoming writes to Tier 1 drives at fastest RAID levels
- Moves inactive data to lower-cost drives, space-efficient RAID levels

## Enables cost-effective all-flash and hybrid solutions

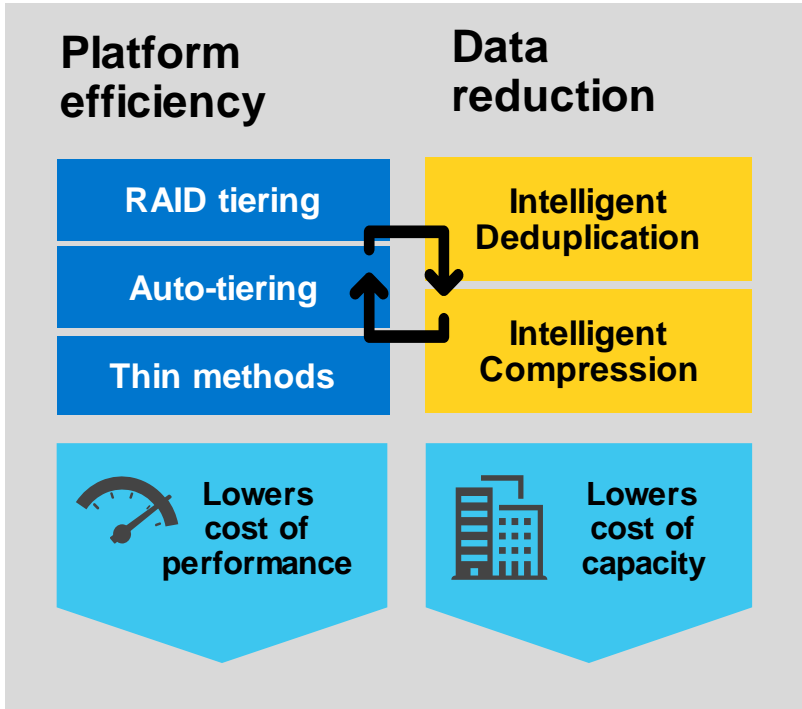

- Separates reads from writes

## Seamless integration with Storage Center OS

- Snapshots, Replication

# Intelligent compression and deduplication

- ✓ Automated efficiency methods work together to maximize your savings
- ✓ Post-process operation compresses and dedupes inactive data
- ✓ Delivers the lowest \$/GB with hybrid and data efficiencies

# SC Series storage efficiency features

## Thin Provisioning

Automatically recover free space. On average, customers reduce storage by 2.3x

## Thin Clones

Create clones from replays with no additional copies. Perfect for cloning Virtual servers or virtual desktops

## Thin RAID

Dynamic RAID provisioning, no need to pre-allocate. Use the performance of ALL the drives in your array for any RAID level, anytime

## RAID Tiering

Write data at RAID 10, then automatically convert to RAID 5/6 *on the same drives*. Performance of RAID 10 @ cost of RAID 5/6

## Deduplication

Data reduction on an average of 4:1 and up to 10:1 for VMWare environments

## Compression

An average of ~60% in MS environments of data reduction on data that is compressed

## Thin Writes

Pattern recognition reduces writes on thick provisioned volumes and VMs

## D@ARE

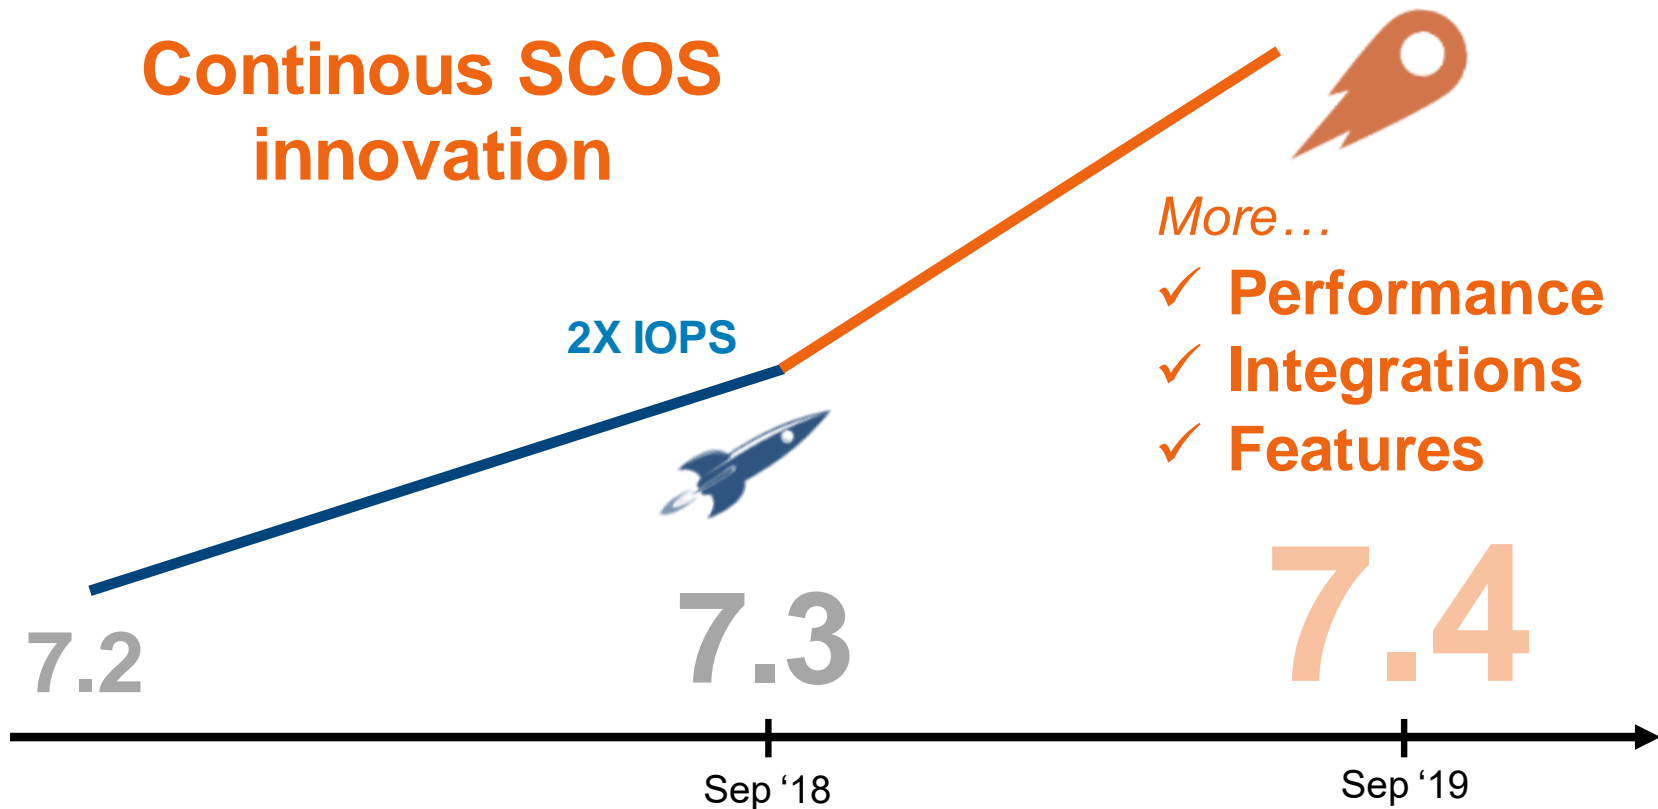

Data-at-rest Encryption

# SCOS 7.4

The next stage of SC Series innovation

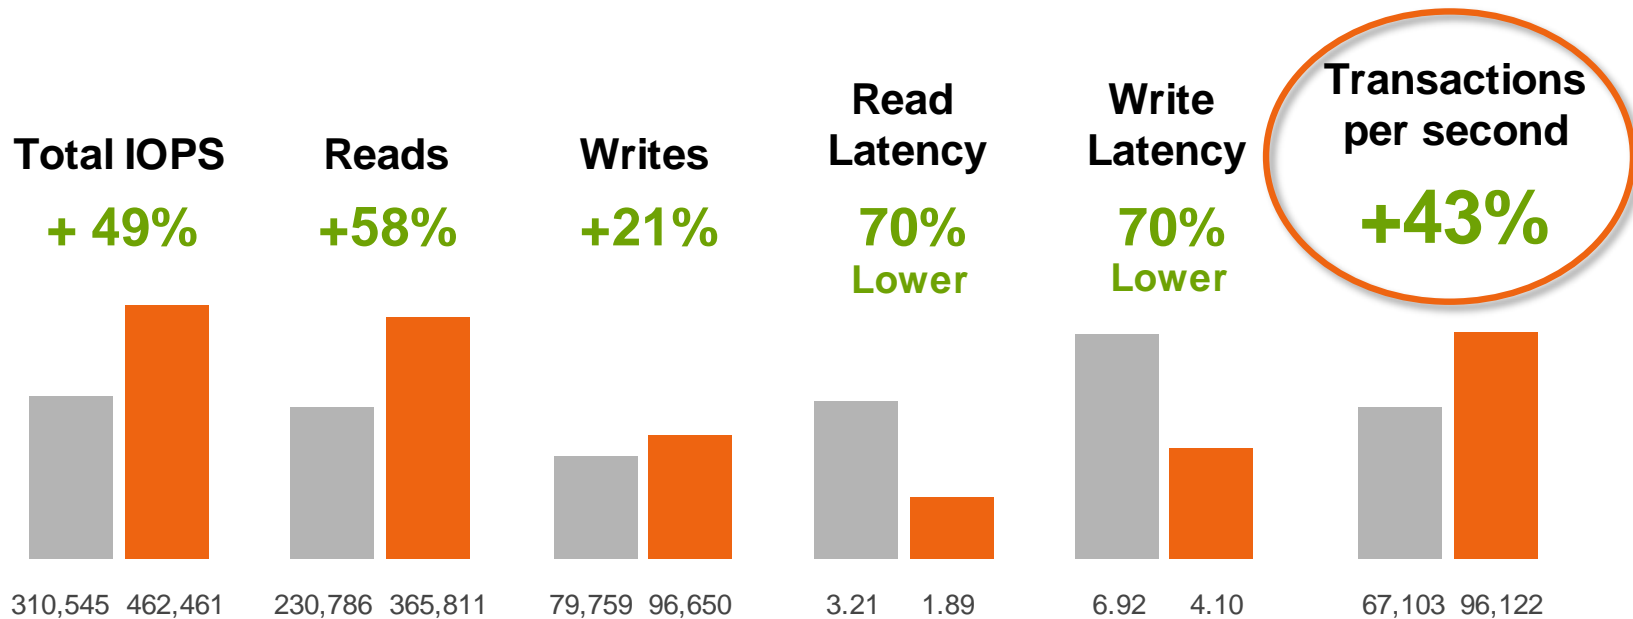

# Building on the Success of SCOS 7.3

**Continous SCOS  
innovation**

# Dell EMC SCOS 7.4: SC7020 SQL performance

*Application-specific improvement vs. SCOS 7.3*

■ 7.3 results  
■ 7.4 results

Based on internal tests performed by Dell EMC in July 2019 on a SC7020 array running TPC-C like workloads (75% reads, 8K sector transfer size) with 7.4 vs 7.3 firmware. Actual performance will vary based on configuration, usage and manufacturing variability

# Dell EMC SCOS 7.4: SC7020 VDI performance

*Application-specific improvement vs. SCOS 7.3*

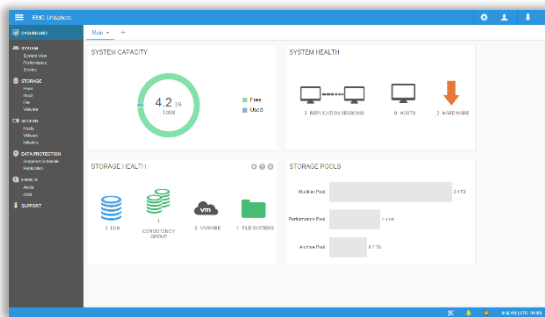

**SCOS 7.4 enabled a 31% increase in supported VMs ...using the same hardware**

## VDI workload test parameters

- **80% writes**
- **0.7 ms latency**
- **60 IOPS per VM – very heavy load!**

Based on internal tests performed by Dell EMC on an SC7020 with 7.4 vs. 7.3 firmware. Actual performance will vary based on configuration, usage and manufacturing variability.

# Dynamic Management Tools for SCOS

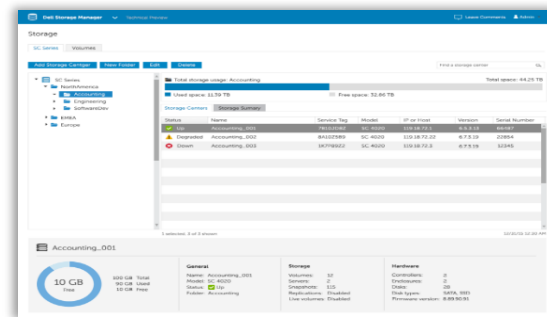

## HTML-5 BASED UNISPHERE FOR SC

- ✓ Access From Anywhere
- ✓ Modern Look and Feel
- ✓ No Install Required

## CloudIQ

- ✓ Cloud Based Analytics
- ✓ Built-in Machine Learning Technology Predicts Anomalies

## DELL STORAGE MANAGER

- ✓ Central Management And Monitoring
- ✓ Supports Up To 10 Arrays

# Dell EMC SC Series NDA Roadmap

## 2019 Q3

### 7.4

- New OS/App Support
  - Microsoft Server 2019
  - vSphere 6.7
- HTML 5 WebUI Initial Setup
- Customer Enhancements
  - Propagate QoS Settings
  - SSL Wildcard & Chaining
- Application Integrations
  - DSITV 5.0 MR
  - DSITV 5.1 w/VMware 6.7
  - VMware SRM 8.1
  - Replay Manager 8.0
  - VROPS 1.3
  - SCOM 4.1

## 2020 2H

### 7.5

- HTML 5 WebUI Phase 2
  - Replication
  - Live Volume
  - Live Migrate
- Static Local Key Manager
- Live Volume Auto-failover RHEL
- Application Integrations
  - vSphere 7.0
  - vCenter plug-in (HTML-5)
  - SRM 8.3
- Customer Enhancements
  - Reporting updates
  - Support bundle updates

Connect on-premise to the cloud

## DELL EMC CLOUD DATA INSIGHTS

Proactive storage health

Flexibly connect your business world to a multi-cloud world

# Dell Technologies Cloud operating model

Reduce multi-cloud chaos with a consistent hybrid cloud approach

## Dell Technologies Cloud Validated Designs

### TRANSFORM

to a cloud operating model

- Leverages VMware Cloud Foundation
- Delivers cloud capabilities to a broader set of workloads
- Validated with Unity XT & other Dell EMC storage

## Dell Technologies Cloud-enabled Infrastructure

### MODERNIZE

existing infrastructure

- Cloud Connected Systems
- Cloud Data Services
- Cloud Data Insights

# Dell Technologies Cloud

Validated designs

Dell EMC Unity XT Midrange Storage

## DELL TECHNOLOGIES CLOUD VALIDATED DESIGNS

- Validated with VMware Cloud Foundation
- Leverage your existing infrastructure investments
- Ideal for high value, storage intensive workloads

# Dell EMC Cloud Storage Services

VMC on AWS for automated Disaster Recovery-as-a-Service

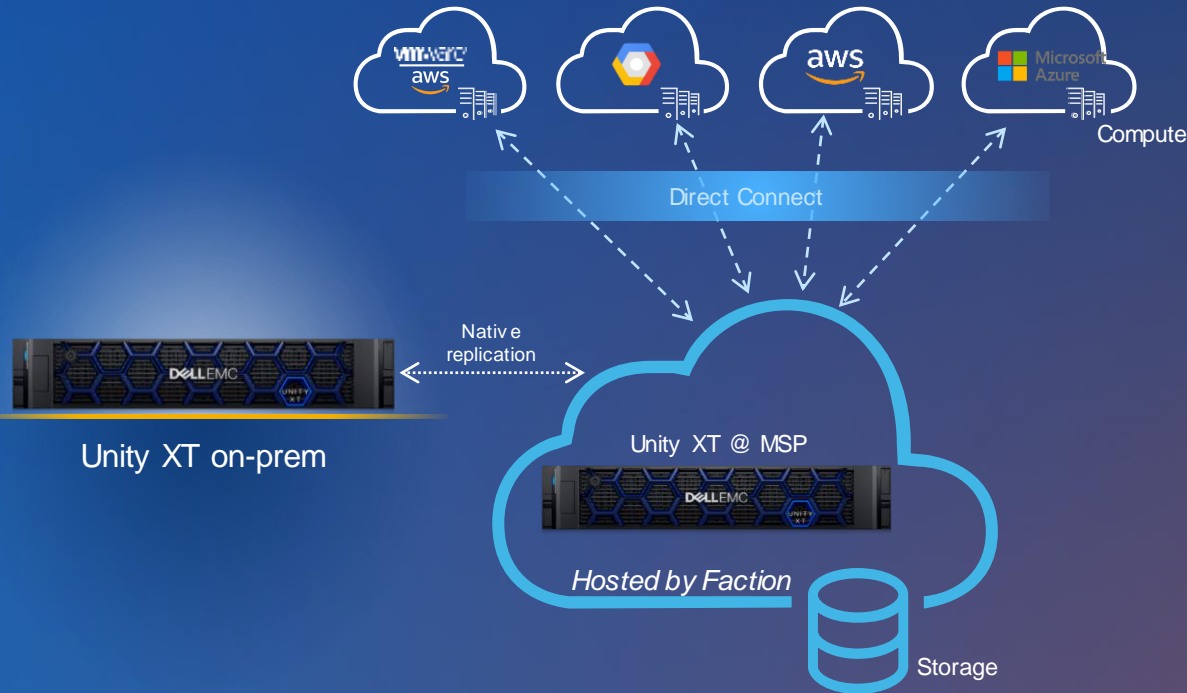

## DELL EMC CLOUD DATA SERVICES

- Operational consistency with VMware environment
- Automated DR operations
- Rapid, enterprise-grade, pay-as-you-go DRaaS
- Only use compute in the cloud when failover occurs
- Lower RPOs and RTOs

# Dell EMC Cloud Storage Services

Multi-cloud for workload migration, analytics and more

## DELL EMC CLOUD DATA SERVICES

- Flexible, multi-cloud support
- No vendor lock-in with data independent of the cloud
- Leverage cloud(s) of choice based on application needs
- Reduce risk with centralized, durable storage
- Fast, low cost set up – nothing else to setup or manage

# Dell EMC Cloud Storage Services

Unity Cloud Edition for SAN/NAS in the cloud

File is more than 50% of all data\* But only 2% is on cloud\*\*

\* Source: Gartner

\*\* Source: IDC

## DELL EMC CLOUD DATA SERVICES

- Implement software-defined SAN/NAS storage in the cloud
- Deploy with VMware Cloud on AWS with broad range of available AWS services
- On-demand infrastructure managed by VMware
- Migrate data between Unity XT systems and virtual instances
- Ideal for VDI Home Directory, Test/Dev and 3rd Replication site

# Cloud Tiering Appliance

Automated tiering with cloud economic benefits

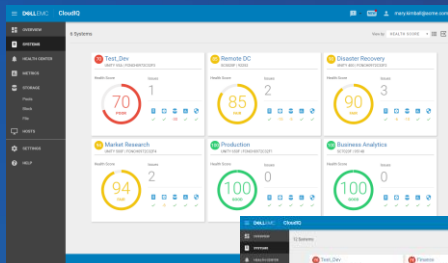

## DELL EMC CLOUD CONNECTED SYSTEMS

- Policy-based
- No-cost RTU license
- Automated file tiering
- Automated snapshot archiving
- Immediate savings
- Deployment flexibility
- Secure and efficient

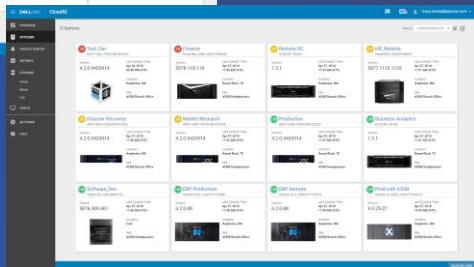

# CloudIQ

Infrastructure insights in the palm of your hand

Intuitive dashboard views

Mobile App for iPhone & Android

- Predictive Analytics
- Anomaly Detection
- Proactive Health

## DELL EMC CLOUD DATA INSIGHTS

- Proactively identify & view risk
- Analyze & view wasted/under-utilized resources
- Establish a trusted advisor state
- Supports most major Dell EMC storage systems

INTEGRATIONS WITH

# DevOps / End-to-End Automation

Unity XT plugin functionality provides the necessary building blocks to simplify automation

## Workload Support

VMs, Containers, Enterprise Apps

[Download CSI Plugin](#)

Manage complex infrastructure without elaborate scripting

## Automation

vRO, Ansible, Python, PowerShell

[Download VRO Plugin](#)

Support CI/CD cycles by serving infrastructure as code

## Infrastructure PaaS

OpenStack, vRA, ServiceNow

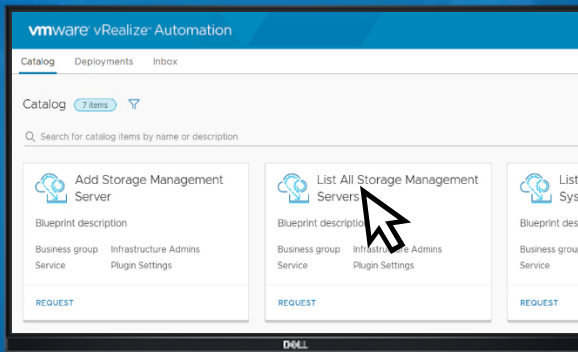

Deliver a self service experience

# vRealize Orchestrator (vRO) plugins

End to end workflows in vRO that include storage management tasks

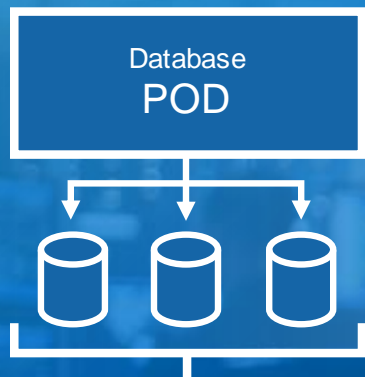

Self service catalog items in vRealize Automation

# CSI plugins for containerized workloads

**Persistent Volumes**  
(Logical volumes in Kubernetes)

Storage Volumes

Deploy and Consolidate  
Containerized Workloads

Deliver best of breed  
performance and data services  
to high value workloads

# Dell EMC Unity Family NDA Roadmap

SHIPPING

DEVELOPMENT

## CY2019 1H 4.5

- Inline Advanced deduplication for Unity AFA (450F to 650F)
- UnityVSA HA (Dual Node)
  - w/ Witness
- File level retention (FLR-E & FLR-C)
- DR Read/Write Access to File Snapshots via SMB
- MetroSync Manager

## CY2019 1H 5.0

- New Unity XT series w/Intel Skylake platform
- Inline Advanced deduplication for all new Unity XT AFA models
- Advanced file replication topologies
- Scale drive count (XT series)
- 12TB NL SAS
- 25Gb IP (XT series)

## CY2020 2H 5.1

- *NVMe Support (XT series)*
- *Hybrid Enhancements*
  - *Dynamic Pools for HFA*
  - *Data reduction for HFA (XT Series)*
- *UnityVSA Cloud Scalability*
- *32Gb FC (XT series)*
- *Unity XT (480+) DIP conversions*
- *File Correlated Stats, (Top Talkers)*
- *Native Multiprotocol File Migration from VNX*
- *Host Groups*

Current Platform

Launch

XT Platform

### Plug-ins Q4 CY2019

- CSI Driver 1.0
- vRO Plugin 1.0
